

**Narrative Summary for 216-979: Predictors of radiographic progression in metastatic castration-resistant prostate cancer: Retrospective analysis of COU-AA-301.**

**Objective:** The objective of the proposed work was to identify predictors of radiographic progression in men with mCRPC with the goal of modifying the frequency of imaging based on patient and/or disease characteristics.

**Methods/Results:** The data for COU 302 (chemo-naïve patients) become available before we started on the proposed analysis for COU 301. Therefore, we proceeded with the data for 302 instead and did not undertake any analysis of the COU 301 data.

**Conclusions:** N/A
