The YODA Project
Research Proposal Review - Final
(Protocol #: 2020-4410 )

Reviewers:
- Nihar Desai
- Cary Gross
- Joseph Ross
- Harlan Krumholz
- Richard Lehman

Review Questions: Decision:
1. Is the scientific purpose of the research proposal clearly described? Yes
2. Will request create or materially enhance generalizable scientific and/or medical knowledge to inform science and public health? Yes
3. Can the proposed research be reasonably addressed using the requested data? Yes, or it's highly likely
4. Recommendation for this data request: Approve

Comments:
Useful and well described proposal to develop predictive models of therapeutic and adverse effect outcomes in patients using abiraterone acetate to treat prostate cancer. Investigators request use of 6 trials, but explain that the project will be completed on Vivli research platform. If only J&J data are being used for this project, and only the 6 J&J trials are named, the project should be conducted through our associated secure, cloud-based research platform. If the investigators are merging other data into the project, which is why they are using Vivli, those additional data should be pre-specified in the research proposal.
