Review Questions:
1. Is the scientific purpose of the research proposal clearly described? Yes
2. Will request create or materially enhance generalizable scientific and/or medical knowledge to inform science and public health? Yes
3. Can the proposed research be reasonably addressed using the requested data? Yes, or it's highly likely
4. Recommendation for this data request: Approve

Comments:
The trials listed will prove too short-term and include too few cancer patients to yield robust conclusions. The investigators will need to double-check that active cancer treatment, or past medical history of cancer, were not used as exclusion criteria for the 16 clinical trials requested for these analyses. Some trials may need to be excluded because patients with cancer were not eligible to participate.
