

Project summary report

#2022-4888

Dose reduction and discontinuation of disease modifying anti-rheumatic drugs (DMARDs) for juvenile idiopathic arthritis

Objective

To assess the benefits and harms of DMARD dose reduction or discontinuation in children and young people with JIA and clinically inactive disease.

Methods Used

A review of the datasets provided to us indicated that they did not have the variables we required. Thus, we did not conduct analyses of the data provided to us.

Results

No data was downloaded or used. No analyses were conducted on the data provided.

Conclusions

N/A
