| 3. Can the proposed research be reasonably addressed using the requested data? | Unsure, further clarification from requestor is needed |
| 4. Recommendation for this data request: | Approve |

Comments:

The proposed analysis is extremely thorough and labor intensive, especially if the image grading is intended to be done independently by more than one assessor (desirable but not specified). It depends on the existence of comprehensive files of high quality endoscopic images which can be shared with the investigators.
