Review Questions:

Decision:

- | | |
|---|----------------------------|
| 1. Is the scientific purpose of the research proposal clearly described? | Yes |
| 2. Will request create or materially enhance generalizable scientific and/or medical knowledge to inform science and public health? | Yes |
| 3. Can the proposed research be reasonably addressed using the requested data? | Yes, or it's highly likely |
| 4. Recommendation for this data request: | Approve |

Comments:

Unclear if all the covariates of interest will be available in each of the RCTs requested, but likely that many of the key variables will be (age, sex, history of CAD). Investigators may need to revise their approach once they have a better understanding of the available covariates to predict underlying cardiac risk.
