

Project Summary Report**YODA Project Protocol #: 2024-0900**

Comparing Beta Cell Preservation Across Clinical Trials in Recent-Onset Type 1 Diabetes

Objective

To document the differences in beta cell preservation across different clinical trials of immune therapies in new onset Type 1 diabetes

Methods

We sought to pull data from the T1GER study of golimumab but were unable to utilize the datasets available through YODA and no analyses were completed

Results

No data was downloaded or used. No analyses were conducted.

Conclusions

N/A
